

The Panini My Vision X™ P check scanner featuring two exit pockets enables Panini customers to perform real-time document sorting in any distributed capture environment with the proven robustness, reliability, and scalability of the My Vision X family of products.

Now, Panini customers have the added benefit of a high performance check scanner strategically designed with two exit pockets for sorting.

Panini's solutions leverage over 60 years of success in enabling clients to capitalize on shifts in the payments processing market.

We selected the Panini My Vision X™ P to complete our distributed capture solution because it's a logical addition to the most reliable check scanner line in the industry,

Steve Creviston, President
C-Soft Imaging

Benefits

- Provides an additional component for an already compelling business case for distributed image capture.
- Sorting and printed text may be determined by MICR or image data.
- Maintains the proven robustness and reliability of the My Vision X family of products, providing the lowest Total Cost of Ownership.
- Sleek design, quiet operation, and compact footprint.
- Includes Panini's Advanced Graphic Printer (AGP) designed for receipt printing.

My Vision X P Applications:

- Sort On-us vs. Transit Checks
- Sort On-us vs. Foreign Items
- Payment Coupons vs. Checks
- Checks Read vs. Checks Rejected
- Checks using ACH methods vs. Checks using Check 21 methods
- Accommodates other sorting requirements

Hardware Characteristics:

- Automatic Document Feeder (Small Feeder (SF) 30 documents per batch, Full Feeder (FF) 120 documents per batch)
- Magnetic Reader – E13B/CMC7 featuring MICR Plus™ technology
- Rear Inkjet AGP (Advanced Graphic Printer) - 2 line and 4 line print capability
- Reg CC Compliant
- 2 Exit Pockets – Capable of holding up to 100 documents
- Panini Vision API
- USB 2 Interface with Cable
- Image Format – 200 dots per inch (dpi), black and white & grayscale, BMP, TIFF, JPEG, and G4
- External Power Supply
- UL® Certified

Software Characteristics:

- Utilizes the Panini Vision API and is software compatible with the complete My Vision X product line.
- Firmware upgradeable through the network from 30 DPM, to 60 and 90 DPM, accommodating a broad range of transaction volume and processing time requirements.
- Microsoft Vista™ Certified

“We selected the Panini My Vision X™ P to complete our distributed capture solution because it’s a logical addition to the most reliable check scanner line in the industry,” says Steve Creviston, President, C-Soft International. “The new scanner provides our customers with an additional exit pocket for sorting ‘non-check21’ cash letter items, on-us versus transit items, foreign items, payment coupons, and others. Distributed capture is a strategic investment for our customers, and the My Vision X P, coupled with Jaguar Software’s flexible applications suite, allows us to offer a cost-effective, superior-quality solution with increased functionality to banking and payment customers.”

About Panini

Panini offers check capture solutions that help customers fully realize the advantages and efficiencies available with the digital transformation of the paper check. Panini’s scalable check capture solutions address the complete range of distributed check processing opportunities.
