- Sorting functions.
- Pocket for rejected and sorted banknotes.
- International Quality Certificate (CE).

Specifications

Detection:	UV, MG, and CIS-scanner technology.
Dimension:	(L) 33 x (H) 37 x (D) 35 cm
Weight:	16,00 kg.
Detection speed:	1000 notes per/min.
Counting speed:	Upto 1500 notes per/min.
Serial number recognition:	Max. 400 notes per/min.
Stacker capacity:	200 notes
Hopper capacity:	300 notes
Reject pocket:	Max. 90 notes
Power:	100V - 240V - 50/60 Hz
Power consumption:	110W

Easy-to-read 4.1 inch LCD display shows variety information simultaneously and provides convenient graphical user interface.

Description

iHUNTER is a superior high speed counting machine with detection abilities for detection of all US Dollar and Euro banknotes without restrictions. iHUNTER can also be adapted for detection of third currency.

iHUNTER has 4 modes of discrimination which makes the machine flexible for different sorting jobs.

By connection iHUNTER to a printer the operator can print out all serial numbers of the processed banknotes or print out the result of counted notes.

Reject pocket for separation of counterfeit banknotes and for non-stop sorting.

Warranty

12 months against defects in material and labour.
